Web	HTML, CSS, JavaScript
Database	SQL, MySQL
Core CS	Data Structures, Algorithms, Object-Oriented Programming
Tools	Git, GitHub, Eclipse, VS Code

PROJECTS

Visitor Entry Logging and Security Monitoring System — Java | QR Code

- Developed a digital visitor management application for maintaining visitor details and security records.
- Implemented QR-based identification with separate entry and exit tracking.
- Added visitor photo capture, visitor search, monitoring, and automated PDF report generation.

Smart Chat Management and Message Recovery System — Queue | Linked List | Stack

- Developed a chat management system using Queue, Linked List, and Stack data structures.
- Used Queue for message processing, Linked List for dynamic chat history, and Stack for deleted-message recovery.
